FREESTANDING SPA BATH INSTALLATION & OWNER GUIDE

Manufactured from premium sanitary grade acrylic, Decina's freestanding spa baths are easy to install, with adjustable self-supporting feet & can be freely located anywhere in your bathroom. This manual provides the correct steps & care advice for a safe & long lasting installation.

THIS PRODUCT MUST BE INSTALLED BY A QUALIFIED TRADESMAN

PRE-INSTALLATION CHECKS

- ❗ Unpack & check the item is correct & no damage has occurred during transit.
- ❗ If there are any visible defects **DO NOT PROCEED WITH THE INSTALLATION** & please contact the place of purchase immediately. **ANY CLAIMS FOR DAMAGE WILL NOT BE ACCEPTED AFTER INSTALLATION.**
- ❗ Protect your spa bath before & during installation, scratches &/or cracks &/or surface damage sustained during or after the installation are not covered by warranty.
- ❗ Installation must be in accordance with building regulations & local authority requirements.
- ❗ Electrical installation must comply with AS:3000 - Electrical Wiring Rules.

CARING FOR YOUR SPA BATH

DECINA USES THE HIGHEST SANITARY GRADE ACRYLIC, HOWEVER NAKED FLAMES, CIGARETTES OR STRONG CHEMICALS SHOULD BE AVOID & REMOVED IMMEDIANTLY. TO PRESERVE THE HIGH GLOSS ACRYLIC SURFACE:

- ❗ When filling the spa bath start with cold water to allow the bath to gradually adapt to the temperature.
- ❗ After using your spa bath clean with a soft cloth & warm soapy water to clean any oils or soap, to prevent tide marks & preserve the polished surface.
- ❗ Clean using warm soapy water & only mild liquid detergents. Do not use powders, pastes, creams, chemicals, window cleaning sprays or abrasive cleaners.
- ❗ Cream cleaners may only **BE USED** to remove stubborn marks.
- ❗ Scratches can be removed with a fine polish like Brasso.

INSTALLATION STEPS

1. Remove your freestanding spa bath from the carton & place it in the correct position for installation. Check for damage & ensure your spa bath does not come in contact with any rough surfaces which may scratch your bath. Place it on cardboard or carpet during installation.

2. Turn the self-leveling feet so the bath base is level & 3-5mm above the finished floor.

A) Ensure there is a gap of 3-5mm between the bath shell & the floor. Installing the bath shell directly onto the bath floor will place pressure on the outside wall of the bath & can crack the bath.

B) Ensure the bath is level so all the water can drain to the waste outlet.

3. Your freestanding spa bath is supplied fully plumbed & with a 10AMP, 50HZ, 240V pump fitted with a 3-pin Power Plug.

Your freestanding spa bath will be required to either be hardwired or plugged into a suitable power point.

For further guidance on the location of the power point & any other electrical requirements, please discuss with your licensed electrician.

4. Carefully tilt the spa bath on its side & connect it to the drain outlet. We recommend using a *Decina Flexible Connector*. Ensure the Flexible Connector is cut to the correct length for easier installation & to prevent drainage issues.

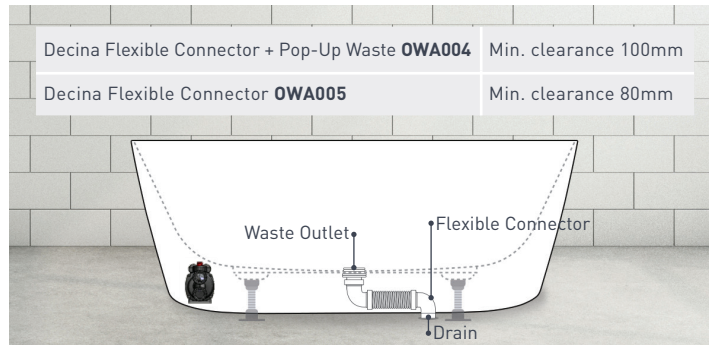

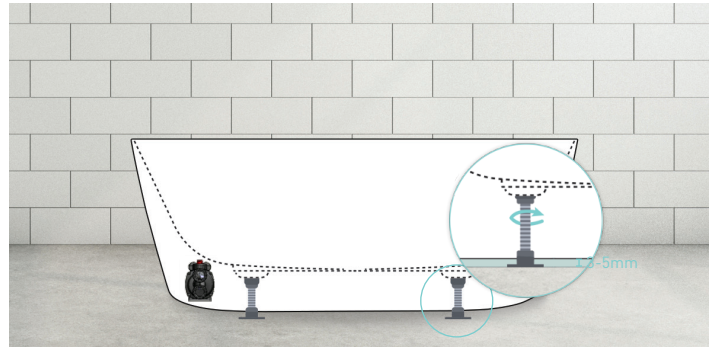

5. Electrically connect your spa bath based on your electricians directions.

6. Before finishing, water test for leaks & correct drainage.

A) Fill the freestanding spa bath with water & check the water flows easily to the waste outlet.

NOTE a small amount of water may pool due to surface tension.

7. Apply a thick bead of silicon around the spa bath base & the finished floor & allow it to set for 24 hours.
